

**Liberator 9 Wireless system. Military technology,  
ultra high security and extreme battery life.**

# IT'S BAD-ASS!

## FEATURES

<p><b>Battery Life:</b> Up to 40 hours of continuous talk time. If you forget to charge the battery or have an extended shift, the Liberator Wireless keeps going.</p>	<p><b>Designed for Combat:</b> Powered by Freelinc's magnetic wireless technology which was originally created for stealth U.S. military operations.</p>
<p><b>No Interference between Bikes:</b> Ride tire-to-tire, handlebar-to-handlebar without interference from other bikes.</p>	<p><b>Don't Worry about the Weather:</b> Handlebar enclosure and PTT switch are fully waterproof (IP-X8) and the SuperMic is weatherproof (IP-X3).</p>
<p><b>Ultra High Security:</b> Double security protection using encryption and Personal Area Network technology.</p>	<p><b>Auto-Syncing:</b> Switch between motorcycles without touching a button.</p>
