

LIBERATOR™ THE FIRST-OF-IT'S-KIND MOTION-ACTIVATED INSTANT-ON WIRELESS HEADSET.

EASY PLUG & PLAY INSTALL! Setcom Corporation brings you the next generation of headsets for fire apparatus intercom systems. The Liberator Wireless Headset! Beyond its state-of-the-art features, The Liberator is the most functional and durable wireless headset available. Installs in minutes and is backward compatible with existing wired Setcom 900 and 1300 systems - Get Some!

Features of the Liberator Wireless Headset:

- Up to 1200 feet of range (line of sight). Typical range 300ft.
- "Instant On" - Advanced motion sensor technology has been integrated into the Liberator Headset.
- Up to 30 hours of continuous talk time allows for more uses with fewer charges.
- Encrypted 128-bit wireless link for maximum security.
- Elimination of some cables reduces intercom installation time and cost.
- Ability to integrate portable radio into the headset allowing the firefighter to simultaneously communicate over 2 radio channels. (Fire ground and Dispatch)
- Premium dual-speaker headset with noise reduction rating of 24dB.
- Heavy-duty and durable design to extend life in a demanding environment.
- Available in Behind-the-Head Style.
- Operates while plugged into vehicle's power.

Wireless Applications and Uses:

- Pump-panel
- Brush truck / wildland fire apparatus
- Tailboard
- Ladder
- Aerial platform or basket
- Incident scene / fire ground
